SOIL CONSERVATION—INDEX TO VOLUME II

JULY 1936–JUNE 1937

Page

ADAMS, HENRY R.: Measuring the Vengeance of a Single Storm 32–35
Agriculture, new approach to flood control. A. L. Patrick .. 245–246, 266
Agronomy, contribution to flood control and drought relief. C. R. Enlow 191–192, 200, 214
ALLRED, B. W.: Range Improvement by Water Spreading. With A. T. Semple 269–270, 288
ANTHONY, HAROLD G.: Erosion Defenses Withstand Pounding of Record Rains 41–43, 57
Atmospheric circulation, changes, relation to floods. B. Holzman and K. Clarke-Hafstad 254–255, 266
AUSTIN, WAYNE—
A Device that Facilitates Seeding of Pasture Terraces and Contour Furrows 38
Seeding Native Grass in Contour Furrows 83

BARNES, F. F.: Stock Ponds in the Great Plains Drought Area. With W. C. Lowdermilk 44–47, 58
BARNES, FARRELL F.: Reservoir Silting in the New River Watershed. With Carl B. Brown 95, 106–107
Barranca, California. Harry E. Reddick 54–55
Beaver Creek watershed, sweetclover on. F. L. Higgins .. 15–16
BENNETT, H. H.—
appointment to committee by President 80
award of degree of Doctor of Laws 11
conversation on soil conservation projects with Mr. Enlow 96–101
talks on flood control 2–6
Utilization of Small Water Powers 74–80
Bluestem, little, value for soil conservation 211
BOKE, RICHARD L.: Laguna Indians Pin Their Hopes to Better Land Use 199–200
Book reviews and abstracts. Phoebe O'Neall Faris. Each issue.
BRINK, WELLINGTON—
Looking Down a 5-Year Road in Southwestern Ohio ... 120–122
Some Cracking Big Gullies 283–284
BROWN, CARL B.—
From Farm Fields to City Streets 189–190, 198
Reservoir Silting in the New River Watershed. With Farrell F. Barnes 95, 106–107
BROWN, H. BATES, Jr.: Slope Factors in Soil Erosion. With Illustrations from the Kentucky Karst 240–242

Page

BROWN, GROVER: Spreading Water in the East 143, 145
BROWN, MARK H.: Travelling Soils. An Erosion Surveyor Views the Flood Zone 252–253, 267–268
Buffalo grass—
description and habits 48–49, 56
native of Great Plains, close-up of. Guy C. Fuller. 48–49, 56–57
BUIE, T. S.: Costs Come Down on 1,937 Miles of Terraces. 151

CALVIN, ROSS: How Main Street Became the Big Ditch .. 102–105
Camera, effectiveness, recommendations 23–24, 35
CARRIER, LYMAN: Eighteen Farmers Say "We'll Do It Ourselves" 165–166, 188
Central Great Plains region, natural vegetation of, reconnaissance mapping. Ben Osborn and H. L. Whitaker .. 181–186
CHARLES, F. E.: Stone Terraces of Kentucky Defy Erosion for Century 64–65, 83
Chemistry and Soils, Bureau of, cooperation with Soil Conservation Service 7
CHIERA, ALBERT: Notes on Erosion Work in Far-Away Italy. 17–18
Civilian Conservation Corps—
and soil conservation. J. G. Lindley 285–286
work of soil conservation in Southwest. C. W. Granger. 161–164, 173
CLARKE-HAFSTAD, K.: Changes in Atmospheric Circulation Result in Floods. With B. Holzman 254–255, 266
CLEMENT, F. E., statement on tree selection 52
Clemson College, water-disposal system 22
Climate, changes, relation to floods 254–255, 266
Climatic and Physiographic Research, Section of, research program. C. W. Thornthwaite 218–220, 236
Coastal plains, controlling erosion in. Alice Nichols 12–13
COHEE, MELVILLE H.: The Application of Farm Management Data in Farm Planning 262–264
College farm, project for control of run-off waters 22
Conservators, regional, problems to Washington Conference. 85–86
Contour—
furrowing in Corn Belt, progress report. Arnold S. Dahl. 141–142, 145
furrows—
following across United States. A. T. Semple 134–138, 145
seeding, facilitated by device. Wayne Austin 38
seeding native grasses in. Wayne Austin 83

Page

Coon Valley, protecting, fin, fur, and feather in. Kenneth Davis 109–113
CORBIN, LEONARD B.: Sampling the Weather at the Oklahoma Climatic Research Center 237–238, 244
Corduroy furrows, protection of High Plains from drought. Fred C. Newport 139–140, 145
Corn Belt, contour furrowing in, progress report. Arnold S. Dahl 141–142, 145
Cotton rotations with lespedeza, experiments 25
Cover, relation to erosion and slope, graphic methods of showing. H. Howe Morse 67
CRIDER, F. J.—
  honor award 38
  Observational Plantings in the Nurseries 146–151

DAHL, ARNOLD S.: Progress Report on Contour Furrowing in the Corn Belt 141–142, 145
Dams, whisker, in Northwest. C. Edwin Hill 174–175, 180
DAVIS, CECIL N.: Wildlife-Saving Farm Ponds of Missouri .. 153–154, 159
DAVIS, KENNETH: Protecting Fin, Fur, and Feather in Coon Valley 109–113
DAVIS, R. H.: Watershed Treatment and Flood Control . 247–250
Desert, Golden Gate Park, transformation into garden .. 72–73, 82
Ditch—
  new type, development 171
  once Main Street, history. Ross Calvin 102–105
Dollars, saving, as soils are saved, in 12 northeastern States 168–173
Drought—
  area of Great Plains, stock ponds. W. C. Lowdermilk and F. F. Barnes 44–47, 58
  program, 1936, Soil Conservation Service. W. F. Peel . 204–207
  protection by corduroy furrows in High Plains. Fred C. Newport 139–140, 145
  relief, contribution of agronomy. C. R. Enlow 191–192, 200, 214
"Drouth-Stricken Area", painting by Alexander Hogue, reproduction 203
Dunes—
  clatsop, anchoring with vegetation. E. M. Rowalt 61–63
  sand, in Great Plains. C. J. Whitfield 208–209
"Dust Bowl", painting by Alexander Hogue, reproduction .. 202

EAGLES, L. D.: Planting Materials Used in Soil Conservation 152
EAKIN, HENRY M., death notice 94
EARGLE, D. HOYE: When Is a Gully Stable 225–227
Earth, turning over with 4-foot plow. Walter V. Kell 123
ENGLEMAN, J. E.: Ecological Relationships in the Oklahoma Climatic Research Center 235–236
ENLOW, CHARLES R.—
  address on Asiatic plants and agronomic practices at Dayton, Ohio 116, 130
  Agronomy's Contribution to Flood Control and Drought Relief 191–192, 200, 214
  conversation with Dr. H. H. Bennett, on soil conservation projects 96–101

Erosion—
  control—
    parallel pathways to. Guy C. Fuller 21–22
    planning, significance of natural vegetation in. Ben Osborn and H. L. Whitaker 126–129
    program in Coon Valley 110–113
  controlling on coastal plains. Alice Nichols 12–13
  defenses withstand pounding of record rains. Harold G. Anthony 41–43, 57
  in Kentucky, control by stone terraces for century. F. E. Charles 64–65, 83
  painting by Alexander Hogue, reproduction 203
  problem, challenge to scientists of many fields 87–94
  relation to slope and cover, graphic methods of showing. H. Howe Morse 67
  soil, slope factors. H. Bates Brown, Jr 240–242
  studies 80
  upland, waste to fertile valleys. Stafford C. Happ ... 194–198
  wind—
    and water, in Oklahoma. Angus McDonald 233–235
    tragedy, discussion 202–203
  work in far-away Italy. Albert Chiera 17–18

FARIS, PHOEBE O'NEALL: Book Reviews and Abstracts. Each issue.
Farm—
  fields, soil movement to city streets by floods. Carl B. Brown 189–190, 198
  management—
    data, application in farm planning. Melville H. Cohee 262–264
    information, need in farm planning. E. H. Reed . 260–261, 266
  plan, relation to woodland. John F. Preston 117–119
  planning—
    application of farm management data to. Melville H. Cohee 262–264
    need for farm management information. E. H. Reed ... 260–261, 266
Farmers—
  citation of long experience with strip cropping. Guy C. Fuller 68–71
  eighteen, cooperation for soil conservation policies. Lyman Carrier 165–166, 188
Fence, black locust, in use after seventy-five years 57
FINNELL, H. H., statement on moisture deposits 1
FIVAZ, A. E.: Farm Woodland: Conserver of Soil and Moisture 28–29, 36–37, 40
Flood—
  control—
    agriculture's new approach. A. L. Patrick 245–246, 266
    and watershed treatment. R. H. Davis 247–250
    contribution of agronomy. C. R. Enlow ... 191–192, 200, 214
    talks by H. H. Bennett 2–6
    weights costs of. Walter J. Roth 201, 207
  menace, challenge to scientists of many fields 87–94
  problems, one angle of 186
  zones, maps, and surveys, data 252–253, 267–268
Floods, relation to changes in atmospheric circulation. B. Holzman and K. Clarke-Hafstad 254–255, 266
FLORY, EVAN L.: Silting Did Not Discourage This Plant .. 193

Page

FONDA, MORRIS: One Farmer's Profits from Black Locust.. 101
Forage, factor in erosion control, studies..... 142, 145
Forester, place in soil conservation. John F. Preston.... 8–10, 14
Forestry practices, for profit..... 212–213, 216
Fourth International Grassland Congress, meeting note... 18
France, control and use of little waters in. M. Albert Magnein..... 124–125, 130
FREUND, CARL, statement on fifteen years of soil-building... 55
FRONTZ, LEROY: Trees for Cash and Conservation.. 212–213, 216
FULLER, GUY C.—
A Close-Up of Buffalo Grass, Native of the Great Plains..... 48–49, 56–57
Following Parallel Pathways to Erosion Control..... 21–22

Golden Gate Park, inspiring story. Eric Walther..... 72–73, 82
GRANGER, C. W.: The C. C. C. and Soil Conservation in the Southwest..... 161–164, 173
Grass, native, seeding in contour furrows..... 83
Grasses, growing along highways..... 26–27
Great Plains—
Buffalo grass native of. Guy C. Fuller..... 48–49, 56–57
drought area, stock ponds in. W. C. Lowdermilk and F. F. Barnes..... 44–47, 58
sand dunes. C. J. Whitfield..... 208–209
Ground preparation, in Italy, description..... 18
Gullies, big. Wellington Brink..... 283–284
Gully—
Control, in Middle West. Ray E. Penn..... 11
heads, rotation, new conservation practice for gully control. H. A. Ireland..... 228–229, 244
stable, discussion. D. Hoye Eargle..... 225–227

HAFSTAD, KATHERINE C.: The Life History of Rainstorms 156–159
HALL, A. R.: The Problem of Soil Erosion in Ante-Bellum Virginia..... 239, 243
HAMILTON, C. L.: Orchard Conference..... 271–276, 286
HAPP, STAFFORD C.: Fertile Valleys Laid Waste by Upland Erosion..... 194–198
Hedges, as windbreaks for irrigated land..... 129
HIGGINS, F. L.: Sweetclover on the Beaver Creek Watershed. 15–16
High Plains, protection from drought by corduroy coat. Fred C. Newport..... 139–140, 145
Highway menace. Paul B. Sears..... 230–232, 243
Highways, improvement by green roadsides. George W. Hood..... 26–27
HILL, C. EDWIN: Whisker Dams in the Southwest.. 174–175, 180
HOLZMAN, B.: Changes in Atmospheric Circulation Result in Floods. With K. Clarke-Hafstad..... 254–255, 266
HOWE, F. B., report on relation of erosion and floods..... 3–4

Indians, Laguna, hopes for better land utilization. Richard L. Boke..... 199–200
IRELAND, H. A.: Rotation of Gully Heads. A New Conservation Practice for Gully Control..... 228–229, 244
Italy—
erosion work in, notes. Albert Chiera..... 17–18
watershed control in. Arthur C. Ringland..... 251, 265, 266

Page

JOTTER, E. V.: Farm Woodland Returns..... 81–82

Karst, Kentucky, slope factors in soil erosion. H. Bates Brown, Jr..... 240–242
KELL, WALTER V.: Turning the Earth Upside Down with a 4-Foot Plow..... 123
Kentucky, stone terraces in, control erosion for century. F. E. Charles..... 64–65, 83

Land, utilization, hope of Laguna Indians. Richard L. Boke..... 199–200
Lespedeza—
seed, harvesting device..... 180
value, experiment..... 25
LINDLEY, J. G.: Soil Conservation and the C. C. C..... 285–286
Locust, black—
profit of one farmer from. Morris Fonda..... 101
value in control of soil erosion..... 25
LOWDERMILK, W. C.—
foreword to April issue of Soil Conservation..... 217
Stock Ponds in the Great Plains Drought Area. With F. F. Barnes..... 44–47, 58

Machine, new, for scarifying terrace channels. William A. Weld..... 214
MCDONALD, ANGUS—
Erosion by Wind and Water in Oklahoma..... 233–235
The Soil Builder..... 50–51, 58
MAGNEIN, ALBERT M., address before Upstream Engineering Conference in Washington, D. C..... 124–125, 130
MAITS, CHARLES B., JR.: She lives by the Side of an Old-Time Mill..... 66, 71
Maps, erosion, publication..... 7
Middle West, gully control, pointers in. Ray E. Penn.... 11
Mill, old-time. Charles B. Maits, Jr..... 66, 71
Missouri farm ponds, for saving wildlife. Cecil N. Davis.. 153–154, 159
Moisture—
conserving by farm woodland. A. E. Fivaz..... 28–29, 36–37, 40
savings-deposits of..... 1
MORSE, H. HOWE: A Graphic Method of Showing the Relationships of Erosion, Slope, and Cover..... 67

NICHOLS, ALICE: Controlling Erosion on the Coastal Plains. 12–13
Norris Dam, silting, prevention by T. V. A. tree planting program..... 114–115
Northeastern States, 12, dollars and soil-saving programs. 168–173
Nurseries, observational plantings, in. F. J. Crider.... 146–151

OBERLIN, R. W.: Farm Ponds Pass Critical Tests..... 210–211
Oklahoma Climatic Research Center—
ecological relationships. J. E. Engleman..... 235–236
weather sampling. Leonard B. Corwin..... 237–238, 244
Oklahoma, erosion, wind, and water in. Angus McDonald..... 233–235
Orchard conference. C. L. Hamilton..... 271–276, 286

Page

Osborn, Ben—
Reconnaissance Mapping of Natural Vegetation of Central Great Plains Region. With H. L. Whitaker..... 181–186
Significance of Natural Vegetataion in Planning Erosion Control and Wildlife Management. With H. L. Whitaker..... 126–129
Pasture terraces, seeding, facilitated by device. Wayne Austin..... 38
Patrick, A. L.: Agriculture's New Approach to Flood Control..... 245–246, 266
Peel, W. F.: The Soil Conservation Service Drought Program of 1936..... 204–207
Penn, Ray E.: Pointers in Gully Control in Middle West. 11
Photographing, suggestions..... 23–24, 35
Plants—
Asiatic, hunting, address by Charles R. Enlow..... 116, 130
used in soil conservation, list..... 152
Plow, 4-foot, use in restoring fertile soil to surface. Walter V. Kell..... 123
Ponds—
on farms, critical tests for. R. W. Oberlin..... 210–211
on Missouri farm, for saving wildlife. Cecil N. Davis. 153–154, 159
stock, in Great Plains drought area. W. C. Lowdermilk and F. F. Barnes..... 44–47, 58
Preston, John F.: The Place of the Forester in Soil Conservation..... 8–10, 14
Pulverizers, operation and uses..... 180

Rains—
heavy, control measures meet challenge..... 1, 7, 14
record, pounding, withstood by erosion defenses. Harold G. Anthony..... 41–43, 57
Rainstorms, life history. Katherine C. Hafstad..... 156–159
Range improvement by water spreading. A. T. Semple and B. W. Allred..... 269–270, 288
Reddick, Harry E.: The California Barranca..... 54–55
Reed, E. H.: Farm Management Information Needed in Farm Planning..... 260–261, 266
Research program, Section of Climatic and Physiographic Research. C. W. Thornthwaite..... 218–220, 236
Reservoir, silting in New River watershed. Carl B. Brown and Farrell F. Barnes..... 95, 106–107
Ringland, Arthur C.: Watershed Control in Italy. 251, 265, 266
Road, 5-year future, plan in Southwestern Ohio. Wellington Brink..... 120–122
Roadsides, green, make staple highways. George W. Hood. 26–27
Roosevelt, President—
appointment of special committee of conservation specialists..... 38
authorization of Upstream Engineering Conference..... 87
Rotation of gully heads, new conservation practice for gully control. H. A. Ireland..... 228–229, 244
Rotations, with cotton and lespedeza, experiments..... 25
Roth, Walter J.: Weighing the Costs of Flood Control. 201, 207
Rowalt, E. M.: Anchoring the Clatsop Dunes with Vegetation..... 61–63
Run-off waters, control on college farm, project..... 22

Page

Rupp, A. E.: Choosing the Right Tree..... 52–53
Ryerson, Gerald E.: Mechanical Ingenuity Spurred by Problems Peculiar to Soil Conservation..... 176–180

Sacaton plant, effect of silting on..... 193
Sands, drifting, stabilizing by *Diplotaxis tenuifolia*..... 129
Sears, Paul B.: Highway Menace..... 230–232, 243
Sedimentation, effect on fertile valleys, studies..... 194–198
Semple, A. T.—
Following Contour Furrows across the United States.... 134–138, 145
Range Improvement by Water Spreading. With B. W. Allred..... 269–270, 288
Sharpe, C. F. Stewart: "Brushing Out" the Banks of Streams..... 221–224
Silting—
effect on sacaton plant. Evan L. Flory..... 193
in reservoirs, rates..... 78–80
Slope—
factors, in soil erosion. H. Bates Brown, Jr..... 240–242
relation to erosion and cover, graphic methods of showing. H. Howe Morse..... 67
Sod cutters, types, and uses..... 176–178
Soil—
builder. Angus McDonald..... 50–51, 58
building, fifteen years, review by Carl Freund..... 55
conservation—
and the C. C. C. J. G. Lindley..... 285–286
cooperation of C. C. C. in Southwest. C. W. Granger..... 161–164, 173
peculiar problems, spur to mechanical ingenuity. Gerald E. Ryerson..... 176–180
place of forester in. John F. Preston..... 8–10, 14
planning. E. J. Utz..... 256–258
planting materials used in. L. D. Eagles..... 152
conserving by farm woodland. A. E. Fivaz... 28–29, 36–37, 40
erosion—
in Lancaster County, Pa., description..... 66, 71
problem in ante-bellum Virginia. A. R. Hall..... 239, 243
fence, old, on opposite sides of. Helen M. Strong..... 277–281, 284, 286
Soil Conservation Committee, appointment and provisions. 7
Soil Conservation Service—
1936, drought program. W. F. Peel..... 204–207
cooperation with Bureau of Chemistry and Soils..... 7
erosion surveys..... 7
soil correlation problems..... 7
Soils—
, problems of two bureaus..... 7
travelling. Mark H. Brown..... 252–253, 267–268
Southwest, work of C. C. C. for soil conservation. C. W. Granger..... 161–164, 173
Stone terraces, of Kentucky, control erosion for century, F. E. Charles..... 64–65, 83
Storm, single, vengeance of, measuring. Henry R. Adams. 32–35
Stream banks, "brushing out". C. F. Stewart Sharpe.....221–224

Page

Streets, city, soil covering from farm fields by floods. Carl B. Brown ... 189–190, 198
Strip cropping, long experience with as cited by farmers. Guy C. Fuller ... 68–71
STRONG, HELEN M.: On opposite Sides of an Old Soil Fence ... 277–281, 284, 286
Sweetclover, on Beaver Creek watershed. F. L. Higgins .. 15–16
